Loader & Unloader Process Checklist

System Setup & Report Overview

- [ ] Introduce a new section of Loader & Unloader (Located in the Procurement section).
- [ ] This is a system-generated report.
- [ ] Ensure daily records capture which unloader unloaded which truck and at what time.
- [ ] Maintain independent daily details for each individual unloader.

Entry & Linkage

- [ ] Link truck entry to the supervisor-selected unloader upon Paddy inward entry.
- [ ] Major unload data is fetched from Paddy Inward details.
- [ ] Record the number of bags unloaded by Unloader 1 (and Unloader 2 if part stack).

Time Tracking Sequence & Rules

- [ ] Maintain chronological sequence for time entries:
    1. Paddy Inward (In Time)
    2. Unloader Allotment (Unload Start Time)
    3. Unloader Finish (Unload Finish Time)
    4. Net Weight Paddy Inward (Out Time)
- [ ] Case: Ensure Unloader Finish time is **not** before Paddy Inward (In Time) or Unload Start Time.

Time Gap Maintenance guideline

- [ ] As mentioned, this much time gap should be maintained.
- [ ] Paddy Inward - Unloader Allotment: **Min 5 minutes**
- [ ] Unloader Allotment - Unloader Finish Time: **Min 30 minutes**
- [ ] Unloader Finish Time - Paddy Inward Net Weight: **Min 5 minutes**

Reporting & Display Requirements

- [ ] Exclude incomplete unload entries from the unloader main list.
- [ ] Display only trucks whose unloading details and net weight Paddy inward entry out time have been recorded to maintain harmony between Unloaded Data and Paddy Inward Data.

Unloading Management Checklist

Vehicle Entry & Hold Rules

- [ ] This is a mill-wise report.
- [ ] During one truck unloading, he cannot unload any other truck. Prevent duplicate entries for the vehicle while processing.
- [ ] Provide a "Hold" option Tick box (with a hold reason) under Unloading Management (Section 4).
- [ ] Ensure a notification pop-up asks for confirmation when selecting "Hold".
- [ ] Display entries marked as "Hold" under **Pending Draft** in Paddy Inward.
- [ ] Allow the unloader to proceed with unloading another truck if a truck is placed on "Hold".

Serial Number & Unloader Count Tracking

- [ ] Generate the Unloader truck count serial number only after the Paddy Inward entry is submitted by the supervisor (once the Net Weight Paddy Inward entry is completed).
- [ ] Do not generate, the unloader truck count no. during active unloading.
- [ ] Credit the truck count to the unloader only when the Net Weight Paddy Inward entry is submitted/completed.

Hold & Unloader Management Rules

- [ ] Unloader cannot be changed once "Hold" is marked.
- [ ] Note that marked "Hold" entries are permanent and do not require deselection.
- [ ] Complete hold entries by selecting them from **Draft Entries**.

Paddy Inward & Unloading Reports

- [ ] Net Weight Paddy Inward entries (completed entries) appear on the Paddy Inward report for that day only.
- [ ] Confirm unloading entries are visible in the **Unloader List of that Unloader** on that day.
- [ ] Maintain strict chronological order for all entries.

Submission & Supervisor Process

- [ ] This need to be done before Paddy Inward report submission.
- [ ] Verify both the Unloader and Supervisor signatures are punched on the report prior to submission.
- [ ] Ensure separate reports are completed and submitted to Admin for each individual unloader.
- [ ] Exclude any vehicles remaining for unloading from that day's unloading list count.

Daily Report Details

- [ ] View Daily Report details organized by unloader (where each unloader report set is available).
- [ ] Print all unloader reports together if desired.

Date Range Wise Format

- [ ] Generate Date Range wise reports for all unloader sets.
- [ ] Download or print date range wise reports for all unloaders.

Specific Unloader Type / Date Range

- [ ] Generate a Date Range format for a specific unloader type.
- [ ] Print all reports for a specific unloader in one go.

	Mill Name			Unloader Name								Date				
	A	**B**	**C**	**D**	**E**	**F**	**G**	**H**	**I**	**J**	**K**	**L**	**M**	**N**	**O**	**P**	**Q**
						Stack Type								Bardana			
	Unloader Truck count	RST No.	Mill.GP	Time in	Time out	Main	Part	Stack No.	Hoodi	Truck No.	Party Name	Mandi	M/C	A class	B class	Total	Labour Party
Total	**													**	**	**	
												Unloader sign		Supervisor Sign			

- [ ] All this data will be fetched from Paddy inward detail.
- [ ] If main/part stack then entry will be in that unloader sheet.
- [ ] The empty section will be left will the (-) dash sign.
- [ ] If stack no. is selected then stack no./ if marked hoodi then in hoodi.
- [ ] Make the count of how many trucks unloaded in Total.
- [ ] Make total of Bags at last by class A and class B.
- [ ] In section P = section N + section O. Sum of A class and B class bag received in one truck.
