Consignment Dispatch Details Checklist
General System & Administrative Requirements

- [ ] Display the Consignment Details section as the fourth section of Yield Management in Admin.
- [ ] Provide a pop-up prompt requiring the supervisor to fill in consignment details after completing the Gate Pass (GP) report.
- [ ] Offer a dedicated, separate option for supervisors to access and input **Consignment Dispatch** details in the supervisor dashboard**.**
- Protocol is to make after the GP report, if the GP report is not made in that day and supervisor trying to fill the Dispatch Details he gets the reminder to fill the gp report. If he cancels the reminder he can max add one day backday entry.

Format

.
.
.

Date…….(Manual entry with max one backdate or same day entry)

This Format will shown as (To supervisor/admin)

					Bags								
Date	GP No.	FCI Slip no.	Consignment No.	Depo. Details	Main	Shortage	Weight at mill	FCI Depo Weight	FCI Portal weight	FCI Moisture	FCI Damage	FCI Discolour	FCI Broken

- [ ] This will a mill wise report.
- [ ] There appears one option for **Add More** after one entry is filled.
- [ ] Send daily reminders to the supervisor until any incomplete data from the previous day is filled out.
- [ ] Ensure tapping on an entry allows him to fill the unfilled tabs without modifying other entries.
- [ ] Require a thumb impression prior to submitting the report.

Consignment & Truck Entry Management

- [ ] Allow multiple FCI Gate Passes within a single consignment dispatch detail entry.
- [ ] Support multiple truck deliveries for a single consignment (e.g., 580 bags across 2 trucks: 200 bags in truck 1, 380 bags in truck 2).
    - [ ] The supervisor can create two distinct entries with **Consignment number** while consignment details are consistent. With a max cap of 580 bags.
- [ ] If the supervisor selects "Today No Consignment Dispatched":
    - [ ] Skip the requirement to complete the full form.
    - [ ] Require a thumb impression prior to submitting the report.
    - [ ] Hide the Nil report entry from the final Consignment Dispatch Report.

System Calculations

- [ ] Calculate Total Dispatch Delivery Details by dividing total Main bags by standard wagon capacity i.e. 580 bags (e.g., { bags dispatched} 20,000 / 580 { bags per wagon} = 34.48 { wagons delivery consignment}).
- [ ] Display the updated consignment delivery status under the respective Dispatch Delivery Status.
