Production Report - Functional Checklist

1. Preliminary Supervisor Actions

- Supervisor must create a batch.
- Supervisor must fill the complete analysis sheet.
- Supervisor must submit the batch.

2. Production State Selection

- [ ] The system must record whether Paddy Drying was selected, Rice Milling was selected,Intermill Processing was selected or “Plant Off” was selected (introduce an option for plant-off shift-wise).
- [ ] Section confirmation: The system show one confirmation notification whether any section is selected.

Paddy Drying	Rice Milling	Intermill Processing	Plant off

- [ ] Plant off : The system shows two time confirmation when Plant off is selected and an option for shift selection and Date,time and supervisor.
- [ ] Fingerprint confirmation: Required for each batch update.

3. Report Views and Comparisons

- [ ] The Supervisor must be shown batch-wise details of each mill in a comparable form.

Table A: Batch-Wise Comparison

		Goyal				Beas				Rajoa		
Items	Batch 01 (Days)	Batch 02 (Night)	Total	(%) Yield Percentage	Batch 01 (Days)	Batch 02 (Night)	Total	(%) Yield Percentage	Batch 01 (Days)	Batch 02 (Night)	Total	(%) Yield Percentage
R. Bran				(Diff in yield)				(Diff in yield)				(Diff in yield)
K. Phuck				(Diff in yield)				(Diff in yield)				(Diff in yield)
Broken Rice				(Diff in yield)				(Diff in yield)				(Diff in yield)
Nakku 1				(Diff in yield)				(Diff in yield)				(Diff in yield)
Nakku 2				(Diff in yield)				(Diff in yield)				(Diff in yield)
Rejection				(Diff in yield)				(Diff in yield)				(Diff in yield)
Final Rice				(Diff in yield)				(Diff in yield)				(Diff in yield)
Net rice				(Diff in yield)				(Diff in yield)				(Diff in yield)
Paddy Drying												

If anykind of Paddy is drying has happened that will be shown at last irrespective of any yield.

- [ ] Ensure "Tapping on Any Mill" opens the respective mill's production history.
- [ ] Date-wise production for all mills must be viewable in a comparable format.

Table B: Date-Range Comparison

Items	Goyal		Beas		Rajoo	
	Production (From - to Date)	**% age as per yield**	**Production (From - to Date)**	**% age as per yield**	**Production (From - to Date)**	**% age as per yield**
R. Bran		(Diff in yield)		(Diff in yield)		(Diff in yield)
K. Phuck		(Diff in yield)		(Diff in yield)		(Diff in yield)
Broken Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Nakku 1		(Diff in yield)		(Diff in yield)		(Diff in yield)
Nakku 2		(Diff in yield)		(Diff in yield)		(Diff in yield)
Rejection		(Diff in yield)		(Diff in yield)		(Diff in yield)
Final Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Net rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Paddy Drying						

- [ ] Ensure "Tapping on Any Mill" opens the respective mill's production history.

4. Data Sources and Calculations

- [ ] The "% age as per Yield" data must be pulled from the "Rice Bags filled" section.
- [ ] The "Rice Bags filled" data will be used as the dividend for finding the yield % output of each mill.
- [ ] The Yield % must be determined from (Feedback 03) based on the rice.
- [ ] The difference in required yield and actual yield (either positive or negative) must be shown in short to the right within each section.
- [ ] The system will show the difference in yield% in both daily reports or selected date reports.

Production Report Paddy Drying or **Intermill Processing Checklist**

Report Selection & Scope

- [ ] Check if **Paddy Drying** or **Intermill Processing** is selected.
- [ ] Display mill-wise report if any one mill process is selected and not in a comparison form.

Batch & Raw Material Details (how data will appear)

- [ ] Display batchwise details along with **Raw Material** and **Quantity (bags)**.
- [ ] Display **Expected finished goods** along with **Quantity (bags)**.

Batch Metadata

- [ ] Ensure the report includes **Batch No.**
- [ ] Ensure the report includes **Batch Date**
- [ ] Ensure the report includes **Shift**
- [ ] Ensure the report includes **Supervisor**

Filtering & Date Views

- [ ] Enable view for selected **Date Results** (showing batch-wise results for that date).
- [ ] Display all of the above information below the main **Rice Mill production reports**.
- [ ] If any **Date Range** needs to be checked for any batch creation process, ensure that only the selected region is shown on the page without opening a new page.
