Yield Management Implementation Checklist

General Scope & Setup

- [ ] Ensure Yield Management applies to operational stock only.
- [ ] Verify Yield Benchmark Data matches (Feedback 03) for both Paddy and Rice Bags produced.
- [ ] Auto-pick all opening stock balances.
- [ ] Set up manual entry capability for Paddy cycle/Paddy usage details only.

Yield Management Types & Navigation

- [ ] Create two core sections under Yield Management:
  - [ ] **Section 1:** Derived from Rice Produced Stock
  - [ ] **Section 2:** Derived from Paddy Stock
- [ ] Introduce the section 3 within the yield management section
  - [ ] **Section 3:** Stock Health report (plus minus wagons details)
- [ ] Display the yield in consolidated format of all firms at one place.(Refer table B of Feedback 10) by showing each mill average yield of its products.

Ref. Table 01 - If the yield is as per Rice

Items	Goyal		Beas		Rajoa	
	Average yield (From - to Date)	**% age as per yield**	**Average yield (From - to Date)**	**% age as per yield**	**Average yield (From - to Date)**	**% age as per yield**
R. Bran		(Diff in yield)		(Diff in yield)		(Diff in yield)
K. Phuck		(Diff in yield)		(Diff in yield)		(Diff in yield)
Broken Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Nakku 1		(Diff in yield)		(Diff in yield)		(Diff in yield)
Nakku 2		(Diff in yield)		(Diff in yield)		(Diff in yield)
Rejection		(Diff in yield)		(Diff in yield)		(Diff in yield)
Final Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Mansoori		(Diff in yield)		(Diff in yield)		(Diff in yield)
Wand		(Diff in yield)		(Diff in yield)		(Diff in yield)
Parmal		(Diff in yield)		(Diff in yield)		(Diff in yield)
FRK		(Diff in yield)		(Diff in yield)		(Diff in yield)
Net rice		(Diff in yield)		(Diff in yield)		(Diff in yield)

Ref. Table 02 - If the yield is as per Paddy

Items	Goyal		Beas		Rajoa	
	Average yield (From - to Date)	**% age as per yield**	**Average yield (From - to Date)**	**% age as per yield**	**Average yield (From - to Date)**	**% age as per yield**
Paddy Used						
R. Bran		(Diff in yield)		(Diff in yield)		(Diff in yield)
K. Phuck		(Diff in yield)		(Diff in yield)		(Diff in yield)
Broken Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Nakku 1		(Diff in yield)		(Diff in yield)		(Diff in yield)
Nakku 2		(Diff in yield)		(Diff in yield)		(Diff in yield)
Rejection		(Diff in yield)		(Diff in yield)		(Diff in yield)
Final Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)
Mansoori		(Diff in yield)		(Diff in yield)		(Diff in yield)
Wand		(Diff in yield)		(Diff in yield)		(Diff in yield)
Parmal		(Diff in yield)		(Diff in yield)		(Diff in yield)
FRK		(Diff in yield)		(Diff in yield)		(Diff in yield)
Net Rice		(Diff in yield)		(Diff in yield)		(Diff in yield)

- [ ] Provide reporting options for:
  - [ ] Daily Report(sum of both batch report + with effect of intermill processing batch reports)
  - [ ] Weekly Report
  - [ ] Month-wise Report
  - [ ] Date Range Report
- [ ] Include a "Till Date Consolidated Record" option in both sections.

Yield from Rice Details

- [ ] Display data in the same format as (Feedback 10) Table B (set to Daily Basis by default).
- [ ] Set the denominator to **Net Rice Produced** for yield calculations.
- [ ] Add a tenure filter to switch report views between Daily, Weekly, Monthly, and Date Range. All reports should be in exportable format in the admin section,restricting supervisor from exporting files.

Yield & Stock Calculations Implementation Checklist
Consolidated Yield Lump-Sum Report for both Rice & Paddy

- [ ] Support two types for the consolidated lump-sum report:
  - [ ] **In terms of Bags**

    - [ ] **In terms of Weight**
- [ ] Display details in the same format (matching Table B format from Feedback 10) same as the table show till date production and difference in yield.
- [ ] Display details in terms of Bags Produced if selected in terms of Bags.
- [ ] Display details in terms of Weight fetched from dispatch details (Consider the Net weight at mill) if selected in terms of Weight.

Calculation of Net Rice (Backend Logic)

- [ ] Implement automatic calculation formula for Net Rice Produced:

.
.
.

    - **(+) Produced Rice Stock in Hand** **……**(Auto Fetch)
    - **(+) Sales / Dispatch** **……** (Auto Fetch)
    - **(-) Purchased Rice Used**
      (*Mansoori, Wand, Parmal, FRK*) **……**(Auto Fetch)

    - **= Net Rice Produced** **……**(Auto Calculated)

.
.
.

Purchased Rice Usage Calculation

- [ ] Calculate backend stock usage for all 4 items (*Mansoori* + *Wand* + *Parmal* + *FRK*):

.
.
.

    - **(+) Stock in Hand** **……..** (Auto)
    - **(+) Sale + Dispatch + Usage** **……...**(Auto)

    - [ ] **= Stock Usage** **……**(Auto)

.
.
.

- [ ] Send the sum of all 4 items to the "Purchase Rice Usage" section for calculating Net Rice Produced.

Calculation of Other Items / By-Products (Backend Logic)

- [ ] Implement backend auto-calculation for that day:

.
.
.

  - **(+) Stock in Hand** **……**(Auto)
  - **(+) Sale + Usage within mill** **……**(Auto)
  - **(-) {Purchase + Inward}** **……**(Auto)

  - **= Net Produced** **……**(Auto)

.
.
.

- [ ] Ensure this calculation of By-Products logic applies to yields derived from both **Rice** and **Paddy**.

Report Format Options on date range selection (from-to) (Admin Selection)

- [ ] **Format 1: Each Page Report**
  - [ ] Display breakdown by Day 1, Day 2 / Week 01, Week 02 / Month 01, Month 02 in single pdf respectively (refer table 01,02 of this feedback with all mills together in comparison format)
  - [ ] Include a "Difference in Yield" section.
  - [ ] Ensure the report is exportable (referencing Table 01,02 of this Feedback).

- [ ] **Format 2: Full Datesheet yield Report (for seeing mill yield trajectory)**
  - [ ] There appears option for selecting any mill
  - [ ] In yield section only this report will be shown mill wise.
  - [ ] Show item names across the top row.
  - [ ] List dates, weeks, or months down the first column.
  - [ ] Display average yield and difference in yield in the last column/section.

When date wise format is selected in Rice

Ref. Table 03 - If the Full Datesheet yield is as per Rice

From Date.15-09-2026 To Date. 17-09-2026

Date	R.Bran	K.Phuck	Broken Rice	Nakku 1	Nakku 2	Rejection	Final Rice	Purchased rice	Net rice
15-09-2026									
16-09-2026									
17-09-2026									
Average yield									
Difference in yield	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)

Ref. Table 04 - If the Full Datesheet yield is as per Paddy

From Date.15-09-2026 To Date. 17-09-2026

Date	Paddy Used	R.Bran	K.Phuck	Broken Rice	Nakku 1	Nakku 2	Rejection	Final Rice	Purchased rice	Net rice
15-09-2026										
16-09-2026										
17-09-2026										
Average yield										
Difference in yield	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)	(Diff in yield)

- [ ] Average yield will show the average of that Item yield from selected range.
- [ ] Diff. in yield shows the difference b/w the benchmark yield (from feedback 03) and the average Yield whether in plus % or Minus percentage.

Checklist: Paddy Yield & Usage Calculation

- [ ] **Determine Yield Measurement Type:** Check if yield is in terms of Paddy bags or in terms of weight consumed.
- [ ] **Set Denominator for Yield Calculation:** Use total Paddy consumed (bags/weight) as the denominator.

- [ ] **Apply Formatting:** Refer Table 02 of this feedback.
- [ ] **Implement Admin / Supervisor Selection Pop-up:** Display a pop-up for calculating Paddy usage in the mill when the Admin/Supervisor selects the **yield-as-Paddy option.**
- [ ] **Calculate Total Paddy Usage:**

.
.
.

  - **(+)** Opening stock (sum total of all paddy inward) **……..**(auto-update)
  - **(-)** Stock in hand **……**.(auto-update from stack record)
  - **(-)** Paddy sale/dispatched **……**.(auto-update from dispatch record)
  - **(+)** Paddy in Main Hoodi **……..**(manual entry)
  - **(+)** Paddy in Dryer **……..**(manual entry)
  - **(+)** Paddy in Silos and Dry Hoodi **……..…**(manual entry)

  - **(=)** Record Total Paddy Used **..……...**(auto-update)

.
.
.

- [ ] **Calculate Final Yield:** Display total Paddy used, add submission signature, and calculate total yield.

Checklist: Reports & Yield Basis

- [ ] **Set Yield Calculation Frequency:** Ensure yield from Paddy is always calculated on a weekly basis.
- [ ] **Enable Periodic Yield Record Viewing:**
  - [ ] Verify weekly yield records can be checked.
  - [ ] Verify monthly yield records can be checked.
- [ ] **Configure Report Views:**
  - [ ] Display page-wise reports for each section (ref. Table 02).
  - [ ] Display consolidated reports (same format as Rice Yield) (ref. Table 04).
